Case Study 1: Personal Portfolio Website

Introduction

A personal portfolio website introduces a student or developer and presents their background in one organized place. It helps visitors quickly understand the creator’s education, technical skills, projects, achievements, résumé, and contact options.

Main Features

• Profile / About section with a short introduction.

• Education and technical skills presented clearly.

• Project cards that describe work and technologies used.

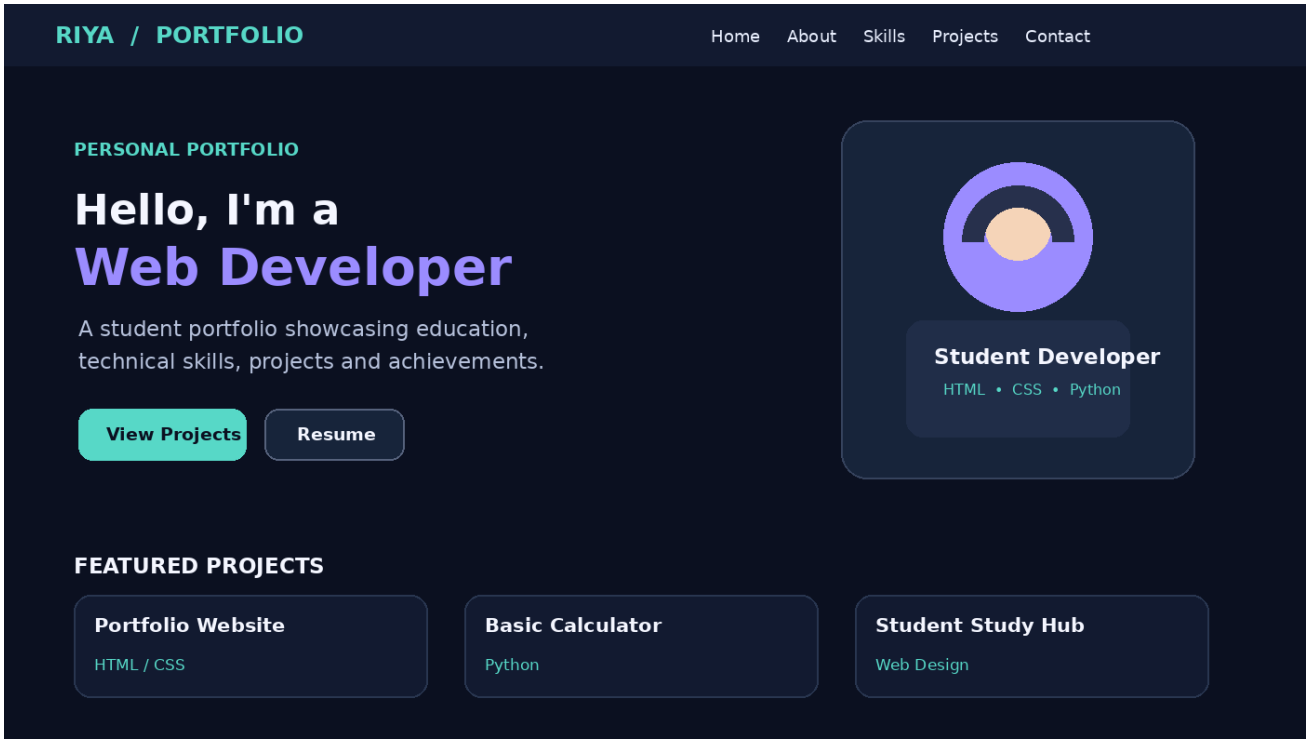

• Achievements, résumé access, and contact information.

• Responsive layout and interactive navigation for desktop and mobile screens.

Technologies Used / Proposed

Suggested technologies: HTML for page structure, CSS for styling and responsive layouts, and JavaScript for navigation or small interactive features.

Case Study 8: Online Food Ordering Website

Introduction

An online food ordering website lets customers browse food items, compare prices, select dishes, and build an order through a simple interface. The goal is to make menu discovery and ordering convenient while presenting food and prices clearly.

Main Features

• Home page with restaurant branding, offers, and a menu shortcut.

• Food categories and product cards with names, images, and prices.

• Add-to-cart controls and a cart summary for selected items.

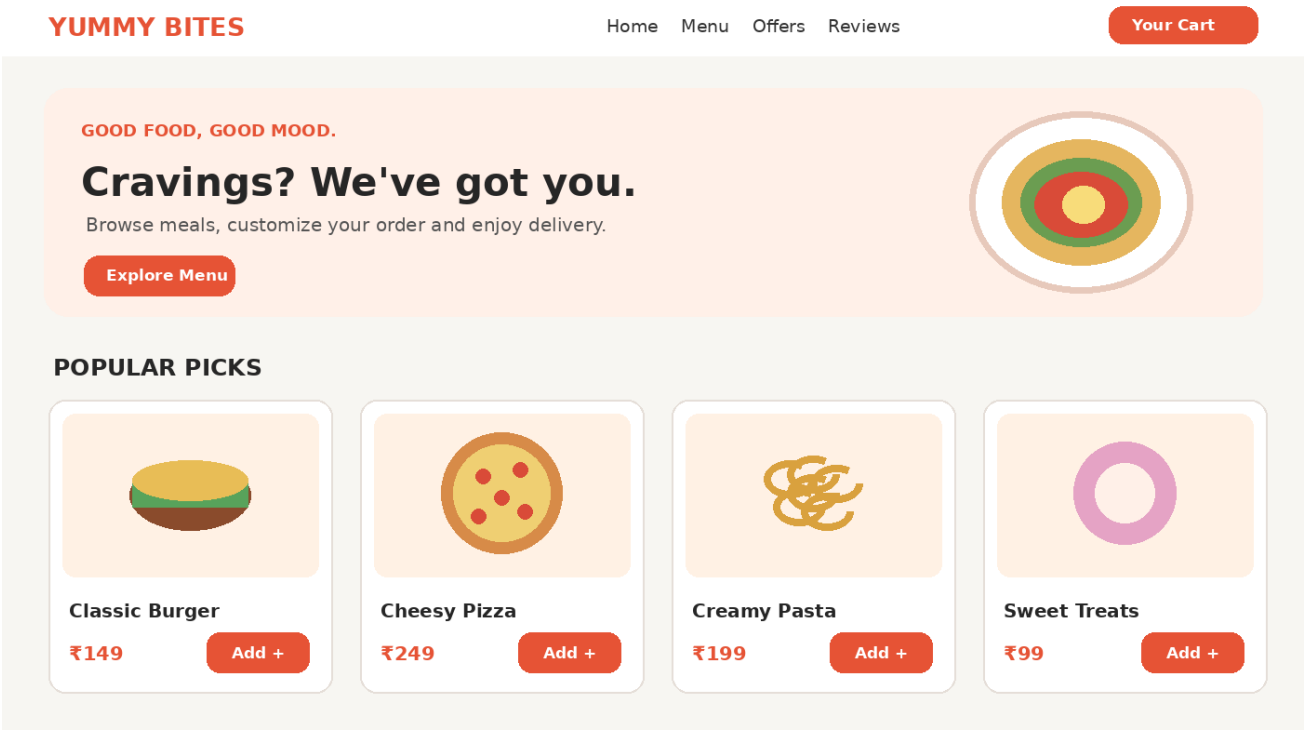

• Order details such as quantity, delivery address, and payment choice can be added.

• Clear navigation and responsive design for different screen sizes.

Technologies Used / Proposed

Suggested technologies: HTML and CSS for the interface, JavaScript for menu filters and cart interactions, and a backend/database if real orders and payments are required.

Case Study 26: College Fest Management Website

Introduction

A college fest management website organizes a university festival in one place. It helps students discover technical events, cultural competitions, workshops, schedules, event coordinators, rules, and registration details.

Main Features

• Fest home page with theme, date, venue, and announcements.

• Separate sections for technical events, cultural competitions, and workshops.

• Event schedules with timings, venues, and coordinator details.

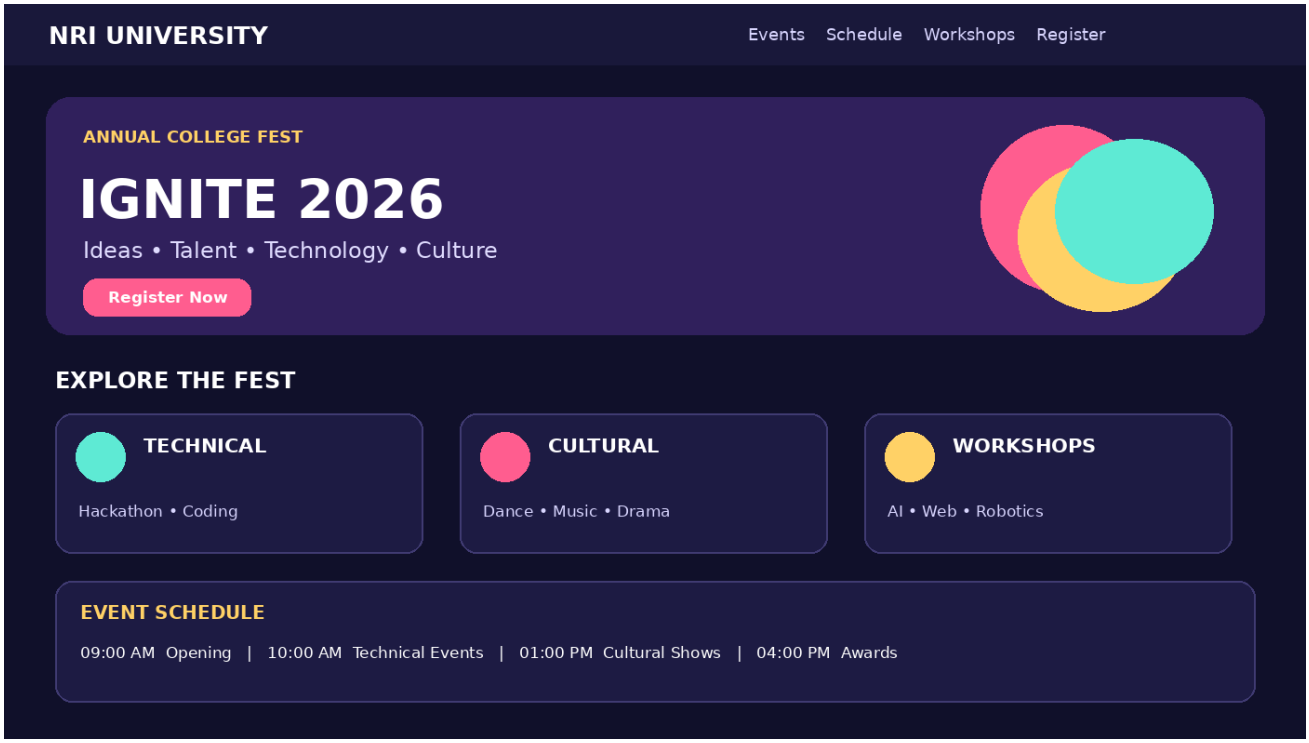

• Rules, eligibility, team-size limits, and participation instructions.

• Registration forms to collect participant details and selected events.

Technologies Used / Proposed

Suggested technologies: HTML and CSS for page layout, JavaScript for interactive forms and event filtering, and a backend/database to store registrations and manage participant lists.
